The screenshot shows the SQL Studio interface. The top toolbar includes icons for file operations and a dropdown menu set to "Query 1". Below the toolbar, there are tabs for "SQL File 4\*", "SQL File 5\*", "SQL File 6\*", and "SQL File 8\*". The active tab is "SQL File 8\*", which contains a SQL query:

```
1 SELECT * FROM category;
2
3
4
5
6 SELECT * FROM language;
7
8
9 SELECT country_id, country FROM country;
10
11 SELECT name FROM category;
```

Below the query editor is the "Results Grid" section. It has a filter input field labeled "Filter Rows:" and an "Export:" button. The results grid displays a list of categories:

The screenshot shows the SQL Studio interface with four tabs: Query 1, SQL File 4\*, SQL File 5\*, and SQL File 6\*. The active tab is SQL File 6\*, which contains five SQL queries. The first query is selected and highlighted:

```
SELECT * FROM language ORDER BY name DESC;
```

Below the queries is the Result Grid, which displays the results of the selected query. It has three columns: language\_id, name, and last\_update.
